"pixie toy"

I obtained inspiration for this project from the imagination I had while window shopping.My story is about a girl and a teddy bear.The main figure is an 8-year-old girl named Diana.I chose a girl as the main figure because she reminds me of the fact that in childhood almost every child has their own shortcomings and issues.This film tells a story that as the little girl secretly plays mischief in a toy shop she is attracted by a toy bear,however,is not as sweet and lovely as it looks...

fish and fishing rod

The film tells the story of two starving men and an elderly man who gives them a fishing rod and a basket of fish.One man soon eats up all the fish and starves to death,and the other man also died before he can find the sea.After that,another pair of hungry men also recievied the old man's rod and fish.Together,they find the sea and eventually live a happy life.I want to express the idea that someone who only cares about short-term interests will only get short-lived pleasure;in contrast,someone who sets high goals while facing the reality of life,it makes harmonious conbination of ideal and reality.
